

OBJECT ORIENTED PROGRAMMING LAB

Experiment No.: 19

Aim

1. Find the average of N positive integers, raising a user defined exception for each negative input.

Procedure

Name: vismaya mohan

Roll No:54

Batch: B

Date:31/05/2022

```
import Average.*;
import java.util.*;

public class PositiveNum
{
    public static void main(String args[])
    {
        double sum = 0;
        Scanner sc = new Scanner(System.in);
        System.out.println("Enter the limit of the Number");
        int n = sc.nextInt();
        int[] numbers = new int[n];
        for(int i =0;i<n; i++){
            System.out.println("Enter the numbers to be inserted");
            numbers[i] = sc.nextInt();
        }
        for(int i =0;i<n; i++){
            try {
                if (numbers[i] >= 0) {
                    sum += numbers[i];
                } else {
                    throw new negative_exception("Negative number is : " +numbers[i]);
                }
            }
            catch (negative_exception e){
                System.out.println(e.getMessage());
            }
        }
        double avg = sum/n;
    }
}
```

```
System.out.println("Average of Positive Numbers =" + avg);
```

```
}
```

```
}
```

```
package Average;
```

```
public class negative_exception extends Exception{
```

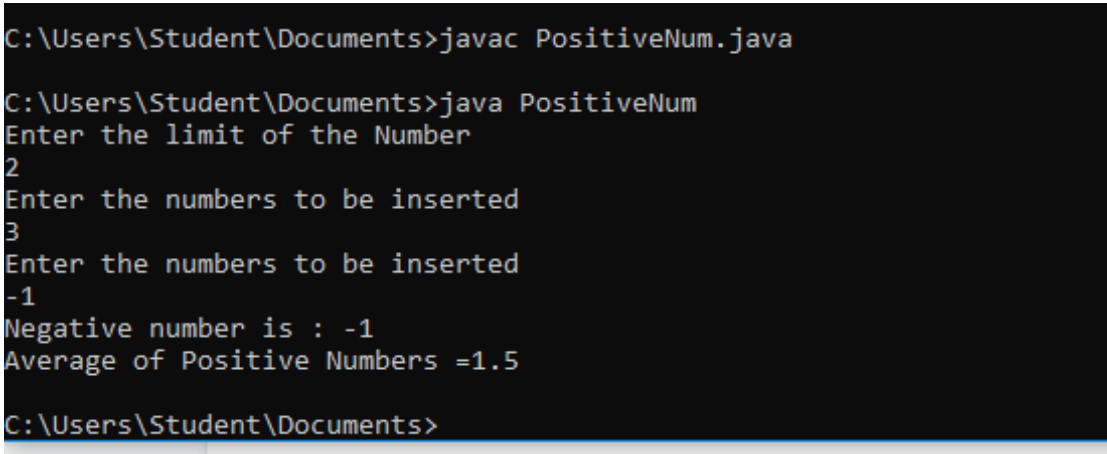

```
    public negative_exception(String s){
```

```
        super(s);
```

```
    }
```

```
}
```

Output Screenshot

```
C:\Users\Student\Documents>javac PositiveNum.java
C:\Users\Student\Documents>java PositiveNum
Enter the limit of the Number
2
Enter the numbers to be inserted
3
Enter the numbers to be inserted
-1
Negative number is : -1
Average of Positive Numbers =1.5
C:\Users\Student\Documents>
```
